BACKGROUND

ABOUT

Experienced Full Stack Web Developer with a demonstrated history of working in the tech industry. I love learning and growing my skills each and every day. I pride myself on clean code and elegant designs implementations.

WORK EXPERIENCE

• Lead Developer, Responsive Data

Sep, 2016 - Present

Develop and plan features and improvements to our various SaaS applications. I also conduct code reviews, evaluations and mentor junior developers

- Built a voicemail marketing platform using ReactJs, Laravel and Twilio
- Designed and created a landing page editor (similar to LeadPages) using AngularJs and Laravel
- Created a web based conferencing platform using Twilio's WebRTC Javascript SDK
- Migrated our companies entire network to Digital Ocean
- Implemented several hosting solutions for our unique company needs, this included a three server MySQL cluster and a custom built HaProxy load balancing solution that handles SSL termination for over a thousand domains

Web App Developer, Responsive Data

May, 2013 - Sep, 2016  3 years 4 months

Build and maintain several web and mobile applications using a variety of technologies.

- Designed and created an automated contact dialing platform using Twilio
- Built our companies external REST API on ZF2
- Created a media storage and service platform for our SaaS application similar to dropbox
